

# Create more opportunities to learn

Giiyo Tech is an education initiative of Giiyo Foundation in Cameroon. We bring learners, schools and experts together to learn technology by building practical projects.

---

## Our work

Recurring STEM Clubs, practical workshops, holiday bootcamps and student showcases. More than 500 learners reached across seven cities in five regions of Cameroon (September 2026).

## Current priorities

Build Your First Robot: Douala, 14–15 November 2026, ages 7–19. Standard fee: 20,000 XAF, sponsored places subject to confirmation. CyberBridge: free cybersecurity for ages 14–19, planned for November 2026, exact date to be confirmed.

## Teach, host or support

CyberBridge is our cybersecurity course. It will be our first course taught by a facilitator abroad, with a presenter in the classroom in Cameroon. Offer your expertise, a classroom, equipment, connectivity or support for a session series. We agree the needs, budget and reporting together.

## The next step

Contact [hello@giiyotech.com](mailto:hello@giiyotech.com) with your area of interest, organisation and availability. We will arrange a conversation and agree a practical contribution.
